Reference Standards Highlights

Below are several Tables with the latest Reference Standard information including out-of-stock items now available; new Reference Standards released in November 2015; backordered items with estimated availability dates; items that have a new price and/or have a new package size; items with lots that are (or soon will be) no longer valid; and items with new lots since the last email notice.

Please contact your USP Customer Service Representative to place an order at +1-301-881-0666 or 1-800-227-8772. European customers can call 00-800-4875-5555. You can also order online at www.usp.org/products.

An expanded list of [USP Reference Standards Under Development](#) has been posted to the USP website. The list includes new **USP Reference Standards that we expect to release within a year**. And, the list is updated four times per year; most recently on **October 9**. The list can be sorted by calendar quarter, monograph name, compendium and more. As of October 9, the list can now also be sorted by Reference Standard category (impurity, small molecule, system suitability, etc).

The Reference Standards Release Notification Service can be used to notify you when a new never-before-released Reference Standard becomes available. The Notification Service does not communicate the release of back-ordered items or lot changeovers. To participate, fill out the form online at www.usp.org/reference-standards/find-reference-standard/notification-service.

USP has expanded its **Donor Recognition Program** to further recognize contributors who participate in the standards-setting process and help make an impact on global health. Visit the [donor recognition page](#) to learn more.

RS Lots That are No Longer Valid

These Tables list previous RS lots that are (or will soon be) no longer valid for official use. If you still have any of these materials on hand, do not use them for compendial testing purposes after the last day of the month for the valid use dates listed. To test products, always be sure you use a current, valid lot of USP RS. Current lot numbers and valid use dates for previous lots are available in the USP Store online [here](#) using the Reference Standards: Alphabetical Listings to look up the item of interest.

Tip of the Month

The *PF* Alert is a new, enhanced PowerPoint recording, briefly highlighting topics presented in the current *PF*. Available bi-monthly when the *PF* is published, this abbreviated and chaptered video allows you to quickly find your topic(s) of interest and gain valuable insight on the upcoming changes to the *USP–NF* that may affect your work. Check out the alert for *PF* 41(5) [here](#). Coming soon *PF* 41(6)

Question of the Month

How can I find out if the USP Reference Standard I am about to use is still valid?

To find out if a Reference Standard is still valid, check the Daily Listing, available in 2 formats [PDF](#) or [XLS](#). Both formats show the current Lot and the previous lot with valid use date. You can also search the [USP store](#) for an item and the entry will list all previous lots and their valid use dates in addition to current and previous lot.
